

Handprint / Footprint Printing Kit

What does my printing kit include?

- One sheet of special paper
- One wipe

Do I need anything else to capture the print/s?

No, but the following would be handy:

- Hard surface, such as a book
- Sticky tape / blue tack
- Baby wipes

How do I capture the print/s?

- Ensure the hand / foot is clean and dry
- Take a book or hard surface and place two pieces of blue tack / sticky tape on it (which will secure the magic paper and stop it from moving around when trying to take print/s)
- On the side of the paper marked with an X, place it on the book in line with the blue tack / sticky tape. You want the side without the X facing up - this is where the print/s will go
- Remove the inkless wipe from the packet and wipe the foot / hand with the wipe thoroughly. Ensure that you have completely covered the bottom of the foot / palm of the hand with the wipe, to ensure a full print is captured
- Be careful not to touch the paper with your fingertips as it will spoil the sheet (your fingerprints will develop in the same way as the hand/foot) One way around this is to quickly wipe your hand with a baby wipe and dry with a tissue before taking the prints
- Press the freshly wiped hand/foot onto the paper. Bring the hand / foot to the paper, rather than the paper to the hand / foot. Make sure that the hand / foot does not move when on the paper as it may result in a smudged finish (don't worry too much though as we can edit away any small smudges)
- Capture as many prints as you can fit on the paper, without them overlapping. We'll select the best one for you jewellery. If you have a preference as to which print we use, please place an X next to it.
- Take a clear, straight on photograph of the whole page of prints, ensuring that there are no shadows visible
- Email the photograph to contact@felixandreuben.co.uk with your name as the subject
- Once received, we'll email you to discuss design details
